Alright, so, I haven't been able to play this game yet. Downloaded it twice to try fix my problem and nothing. Load into the game, try use my XBOX control and it doesn't work. Try get into the settings editor, doesn't work and Windows is unable to find a solution. Does anyone have any ideas on how to sort this out? I'm giving it a week and then asking for a full refund from Steam. I run Windows 10 and my PC is more than capable of running this game.. Wish I had more time for gaming, need to put atleast 200 more hours into this beauty. One of the best passion projects I've enjoyed, Arcen humbly stuck by it through thick and thin and provides you with a colossal sum of gameplay for a price that is borderline piracy. These guys and their community that helped them deserve every penny.

Hard is the difficulty you want to stick to in order to really see the beauty of the game and all the enemies at full effect..and "Misery" is aptly named. The difficulty scaling in this game is quite finely tuned so that you can build your skill to the genre and progress. Awesome for them to provide that.

Love the new music tracks and the Paladin/Zephyr. Thanks a lot for the ex-pack.. Unless you enjoy talking balls that make engine sounds and jump around in a small arena, I would not get this game. I only paid \$0.29 for it, but I just don't like it. I closed the game after 5 minutes and never played it again.. Ahhhhhhhhhh the glorious years of Dungeon Crawlers...

If Legend of Grimrock resurrected this style with great success, few others tried with more or less achievement, to renew it adding concepts like MMO fight style, rogue-like, lots of talk, ...

Heroes of the Monkey Tavern has chosen the simplicity, most of the time with success.

I would advise this game for beginners to the genre or to those who want to have fun without getting a headache!. Incredible game and very immersive so far. I definitely reccomend this to just about anyone.. Probably the best Jackbox games in a lot of people's opinion. Kind of a shame that it isn't in any packs.. bull♥♥♥♥♥

This game did not age well and how it looks is not the problem here as, subjectively, it doesn't look to horrible, sometimes better than a lot of new fire and rescue themed games. The main problem is the AI or lack of it to be more precise. That actually makes you lose the game sometimes. Civilians exist only to annoy you and make sure they walk into every dangerous place possible; you tell them to evacuate the building and they just stand there; you try to redirect the civilians - the radius of that is I think less than 10cm. And the path finding, the glorious path finding - you can get your vehicles and people randomly stuck because they can decide that going through a wall is a better way to get to the destination than taking a slightly longer road nearby. This is one of these games that you remember playing during your teenage years, but now it is just time to put it 6ft below the ground.. Cossacks 3: The Golden Horde is just totally pointless 1v1 missions, i was hoping that i could play with my friend in coop and not versus him.. The best game ever!
Dont buy because of tradingcards

YOU need this game!!!!. This game has great level design. Beating the levels feels like a real accomplishment!. THIS GAME WAS ONE CENT PEOPLE. EVERYONE IN THE WORLD HAS IT. WHY DON'T YOU PLAY IT. GOD DAMN. IT'S A GOOD GAME TOO.
